

# Grid Shares<sup>TM</sup>

## WHAT WE DO

Fractional ownership tokens for physical infrastructure (solar, EV chargers, 5G nodes, compute clusters). Each token carries performance metrics, revenue formulas, and automated micro-distributions to holders.

## KEY FEATURES

- Event Bus: Sub-second revenue distribution
- Geo-positioned tokens: Physical asset sync
- Mutable state: Real-time performance tracking
- Compliance-first: Securities, KYC/AML built-in
- DUAL-native: Mutable state + Event Bus

## MVP

**10-panel solar farm** with live revenue distribution. Automated hourly kWh settlements to token holders. Production-ready in 16 weeks.

## WHY GRID SHARES WINS

Only platform combining fractional ownership + revenue sharing + compliance. Real-world asset focus with actual revenue streams. Sub-second settlement faster than competitors. Compliance-first removes regulatory friction.

## TARGET MARKET

DePIN projects • Renewable developers • Infrastructure funds • Retail investors • Telecom operators

## MARKET SIZE

- DePIN VC: \$744M
- Fractional infrastructure TAM: \$50B+
- Global renewable capex: \$500B annually

## REVENUE MODEL

- 1-2% of distributed revenue per transaction
- SaaS fees: \$5K-20K per asset/month
- Projection: \$500K Y1 → \$35M Y5

## FUNDING & TIMELINE

### **\$500K Pre-Seed:**

- Smart contracts & audit: \$200K
- Compliance & legal: \$100K
- MVP deployment: \$100K
- Team & marketing: \$100K

### **16-week to production MVP.**

## DUAL ADVANTAGE

Native integration with mutable state & Event Bus. Geo-position pins tokens to physical assets. Guaranteed sub-second finality + audit trail. Composable with other DePIN tokens.

## NEXT STEPS

Series A readiness with \$2M+ ARR by Month 18. White-label SDK for other DePIN projects. Multi-asset expansion (IoT, 5G, compute). DAO governance for ecosystem growth.
